(54) PHOTOCATALYTIC DEVICE AND DEVICE APPLYING THE SAME

(57)Abstract:

PURPOSE: To obtain a photocatalytic device utilizing a photocatalytic reaction with a photocatalyst for purifying and sterilizing air and water as a compact structure applicable even to a place not exposed to sunbeams, a narrow place, etc., consuming small electric power and emitting chromatic light.

CONSTITUTION: This photocatalytic device has a substrate 1 with a photocatalytically reactive surface formed by carrying a photocatalyst 2 made of a thin titanium dioxide film and a light emitting diode disposed so that it can illuminate the photocatalyst 2 and chiefly radiating prescribed visible light and UV rays of 360-400nm wavelength. Since the diode 3 is used as a UV source for activating the photocatalyst 2, the entire device can be made compact. This device is put to practical use as a deodorizing device, a drinking water purifier, an antibacterial

device with an antibacterial surface, etc.

LEGAL STATUS

[Date of request for examination] 06.04.2000

[Date of sending the examiner's decision of rejection] 25.11.2003

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]
